

Kommand is a privately owned proprietary limited company with proven capabilities in:

- The hire of machine control & site management equipment to the civil, construction, infrastructure and mining industries;
- The service of machine control & site management equipment;
- The sale of machine control & site management equipment

We are committed to the delivery of these services in a manner that protects and conserves the environment. We will meet or exceed all applicable legislative and regulatory requirements, as well as environmental management standards to comply with the necessary Australian standards.

- Aggressively pursuing pollution prevention;
- Encouraging waste reduction, reuse and recycling;
- Conserving natural resources; and
- Adopting environmental best practice principles into our operations.

We will accomplish this high standard of performance by:

- Established sound environmental management systems;
- Setting up and achieving goals and objectives;
- Employee and subcontractor participation; and
- Promoting continuous improvement.

We work in partnership with clients, subcontractors, suppliers, the community, and other stakeholders to help protect and improve the environment. We foster open communication in order to anticipate important environmental concerns, share relevant information, contribute to development of sound solutions, and respond in a constructive and timely manner.

Our goal is to continue Kommand's tradition of sound environmental performance which is achieved by carefully blending ecological, social and economic considerations into our business planning and decision-making process, while balancing the interests of the present with those of future generations.

Gerald Kirkpatrick
Director
